Loving Music Till It Hurts William Cheng 2019-10-01 Can music feel pain? Do songs possess dignity? Do symphonies have rights? Of course not, you might say. Yet think of how we anthropomorphize music, not least when we believe it has been somehow mistreated. A singer butchered or mangled the "Star-Spangled Banner" at the Super Bowl. An underrehearsed cover band made a mockery of Led Zeppelin's classics. An orchestra didn't quite do justice to Mozart's Requiem. Such lively language upholds music as a sentient companion susceptible to injury and in need of fierce protection. There's nothing wrong with the human instinct to safeguard beloved music . . . except, perhaps, when this instinct leads us to hurt or neglect fellow human beings in turn: say, by heaping outsized shame upon those who seem to do music wrong; or by rushing to defend a conductor's beautiful recordings while failing to defend the multiple victims who have accused this maestro of sexual assault. Loving Music Till It Hurts is a capacious exploration of how people's head-over-heels attachments to music can variously align or conflict with agendas of social justice. How do we respond when loving music and loving people appear to clash?

Connectivity Conservation Kevin R. Crooks 2006-11-02 One of the biggest threats to the survival of many plant and animal species is the destruction or fragmentation of their natural habitats. The conservation of landscape connections, where animals, plants, and ecological processes can move freely from one habitat to another, is therefore an essential part of any new conservation or environmental protection plan. In practice, however, maintaining, creating, and protecting connectivity in our increasingly dissected world is a daunting challenge. This fascinating volume provides a synthesis on the current status and literature of connectivity conservation research and implementation. It shows the challenges involved in applying existing knowledge to real-world examples and highlights areas in need of further study. Containing contributions from leading scientists and practitioners, this topical and thought-provoking volume will be essential reading for graduate students, researchers, and practitioners working in conservation biology and natural resource management.

Education and Technology for a Better World Arthur Tatnall 2009-07-03 Education and Technology for a Better World was the main theme for WCCE 2009. The conference highlights and explores different perspectives of this theme, covering all levels of formal education as well as informal learning and societal aspects of education. The conference was open to everyone involved in education and training. Additionally players from technological, societal, business and political fields outside education were invited to make relevant contributions within the theme: Education and Technology for a Better World. For several years the WCCE (World Conference on Computers in Education) has brought benefits to the fields of computer science and computers and education as well as to their communities. The contributions at WCCE include research projects and good practice presented in different formats from full papers to posters, demonstrations, panels, workshops and symposiums. The focus is not only on presentations of accepted contributions but also on discussions and input from all participants. The main goal of these conferences is to provide a forum for the discussion of ideas in all areas of computer science and human learning. They create a unique environment in which researchers and practitioners in the fields of computer science and human learning can interact, exchanging theories, experiments, techniques, applications and evaluations of initiatives supporting new developments that are potentially relevant for the development of these fields. They intend to serve as reference guidelines for the research community.

The House of the Scorpion Nancy Farmer 2013-08-01 Matt is six years old when he discovers that he is different from other children and other people. To most, Matt isn't considered a boy at all, but a beast, dirty and disgusting. But to El Patron, lord of a country called Opium, Matt is the guarantee of eternal life. El Patron loves Matt as he loves himself - for Matt is himself. They share the exact same DNA. As Matt struggles to understand his existence and what that existence truly means, he is threatened by a host of sinister and manipulating characters, from El Patron's power-hungry family to the brain-deadened eejits and mindless slaves that toil Opium's poppy fields. Surrounded by a dangerous army of bodyguards, escape is the only chance Matt has to survive. But even escape is no guarantee of freedom because Matt is marked by his difference in ways that he doesn't even suspect.

Interoperability Cost Analysis of the U.S. Automotive Supply Chain Smita Brunnermeier 1999-09-01 NIST's Manufacturing Engineering Laboratory (MEL) is developing standards that promote interoperability among members of the U.S. automotive supply chain. This study assesses the costs of imperfect interoperability to the U.S. automotive supply chain and describes the sources of these costs. This study estimates that imperfect interoperability imposes at least \$1 billion per year on the members of the U.S. automotive supply chain. By far, the greatest component of these costs is the resources devoted to repairing or reentering data files that are not usable for downstream applications.
