The Software Craftsman Sandro Mancuso 2014-12-12 Be a Better Developer and Deliver Better Code Despite advanced tools and methodologies, software projects continue to fail. Why? Too many organizations still view software development as just another production line. Too many developers feel that way, too—and they behave accordingly. In The Software Craftsman: Professionalism, Pragmatism, Pride, Sandro Mancuso offers a better and more fulfilling path. If you want to develop software with pride and professionalism; love what you do and do it with excellence; and build a career with autonomy, mastery, and purpose, it starts with the recognition that you are a craftsman. Once you embrace this powerful mindset, you can achieve unprecedented levels of technical excellence and customer satisfaction. Mancuso helped found the world's largest organization of software craftsmen; now, he shares what he's learned through inspiring examples and pragmatic advice you can use in your company, your projects, and your career. You will learn Why agile processes aren't enough and why craftsmanship is crucial to making them work How craftsmanship helps you build software right and helps clients in ways that go beyond code How and when to say "No" and how to provide creative alternatives when you do Why bad code happens to good developers and how to stop creating and justifying it How to make working with legacy code less painful and more productive How to be pragmatic—not dogmatic—about your practices and tools How to lead software craftsmen and attract them to your organization What to avoid when advertising positions, interviewing candidates, and hiring developers How developers and their managers can create a true culture of learning How to drive true technical change and overcome deep patterns of skepticism Sandro Mancuso has coded for startups, software houses, product companies, international consultancies, and investment banks. In October 2013, he cofounded Codurance, a consultancy based on Software Craftsmanship principles and values. His involvement with Software Craftsmanship began in 2010, when he founded the London Software Craftsmanship Community (LSCC), now the world's largest and most active Software Craftsmanship community, with more than two thousand craftsmen. For the past four years, he has inspired and helped developers to organize Software Craftsmanship communities throughout Europe, the United States, and the rest of the world.

Computation of Language Roland Hausser 2012-12-06 The study of linguistics has been forever changed by the advent of the computer. Not only does the machine permit the processing of enormous quantities of text thereby securing a better empirical foundation for conclusions—but also, since it is a modelling device, the machine allows the implementation of theories of grammar and other kinds of language processing. Models can have very unexpected properties both good and bad—and it is only through extensive tests that the value of a model can be properly assessed. The computer revolution has been going on for many years, and its importance for linguistics was recognized early on, but the more recent spread of personal workstations has made it a reality that can no longer be ignored by anyone in the subject. The present essay, in particular, could never have been written without the aid of the computer. I know personally from conversations and consultations with the author over many months how the book has changed. If he did not have at his command a powerful typesetting program, he would not have been able to see how his writing looked and exactly how it had to be revised and amplified. Even more significant for the evolution of the linguistic theory is the easy testing of examples made possible by the implementation of the parser and the computer-held lexicon. Indeed, the rule set and lexicon grew substantially after the successes of the early implementations created the desire to incorporate more linguistic phenomena.

Inside the Fisher Body Craftsman's Guild John L. Jacobus 2011-12-01 From 1930 to 1968, General Motors sponsored a 1:12 scale model automobile design competition for youth—the famous Fisher Body Craftsman's Guild. Each year thousands of boys and young men from across America competed for scholarships by designing, building, and submitting a scale model of their own "dream car," to be judged on such qualities as design originality and craftsmanship. A public relations bonanza for GM, the program helped to identify and nurture a generation of future leaders in design engineering, automotive design, automotive styling, industrial design and other endeavors. In these essays, more than 30 Guildsmen chronicle their experiences in the competition, revealing their model car design techniques, tricks, and secrets: Philip J. Rauth, Joseph R. Rauth, Herman I. Rauth, Roger D. Teter, Gordon D. Williams, William A. Keyser, Jr., Warren M. Bakken, Wilfred C. Keagy, Arnold L. Joslin, Raymond P. Wykes, Charles R. Foreman, Adrian A. Bruno, Charles H. Stewart, George E. Anderson, William D. Scott, Walter F. O'Neill, Jr., Thomas L. De Fazio, Felix R. Collazo, Ronald J. Will, Roger L. Schneider, Thomas L. Covert, Paul F. Bonfilio, George G. Herzog, Samuel L. Kjellman, Frederick J. "Bud" Magaldi, Geza A. Loczi, Jeffrey A. Jones, Robert W. Lawhn, Tom W. Graboski, Terry P. Graboski, Spencer L. Mackay, Grant Onnie, John L. Jacobus and John M. Mellberg.

The Fisher Body Craftsman's Guild John L. Jacobus 2013-07-01 The Fisher Body Craftsman's Guild was a national auto design competition sponsored by the Fisher Body Division of General Motors. This competition was for teenagers to compete for college scholarships by designing and building scale model "dream" cars. Held from the 1930s through the 1960s, it helped identify and nurture a whole generation of designers and design executives. Virgil M. Exner, Jr., Charles M. Jordan, Robert W. Henderson, Robert A. Cadaret, Richard Arbib, Elia 'Russ' Russinoff, Galen Wickersham, Ronald C. Hill, Edward F. Taylor, George R. Chartier, Charles W. Pelly, Gary Graham, Charles A. Gibilterra, E. Arthur Russell, William A. Moore, Terry R. Henline, Paul Tatseos, Allen T. Weideman, Kenneth J. Dowd, Stuart Shuster, John M. Mellberg, Harry E. Schoepf, and Ronald J. Will, are among those designers and design executives who participated in the Guild. The book also describes many aspects of the miniature model Napoleonic Coach and other scale model cars the students designed.

**Language in the Media** Sally Johnson 2018-10-18 Examining the ways in which the media represents language-related issues and how it shapes and constructs what people think language is, this book offers a multilingual survey of the construction of language in and by the media. Tackling the big issues of identity, gender, youth, citizenship, politics and ideology across a range of mediums including television, radio, newspapers, magazines and the internet, Language in the Media brings together an international team of experts to examine how the media gives language distinctive forms and values. This is an essential text for students and researchers of sociolinguistics or language and communication. At a time when trust in the mainstream media is at an all-time low and world leaders are using new media to deride so called 'fake news', this classic text offers insight and critical analysis into the key issues surrounding the relationship between language, the media and its audience.

**Great Book of Shop Drawings for Craftsman Furniture, Revised & Expanded Second Edition** Robert W. Lang 2020-07-01 Great Book of Shop Drawings for Craftsman Furniture, Revised & Expanded Second Edition is a complete sourcebook of working shop drawings for 61 classic pieces of American furniture. Whether known as Craftsman, Arts & Crafts, or Mission, these sturdy, straightforward and immensely popular designs have graced American homes for more than 100 years. The author, a master cabinetmaker, measured original Craftsman antiques to create these detailed plans. This revised new paperback edition is compiled from three of his previous books: Shop Drawings for Craftsman Furniture; Shop Drawings for Craftsman Inlays & Hardware; and More Shop Drawings for Craftsman Furniture. Every type of furniture is represented here: from trestle tables, love seats, and nightstands to corner cabinets, rockers, tabourets and more. With perspective views, elevations, sections, details, and cutting lists, this book gives woodworkers the heart of the Craftsman aesthetic, along with all the information needed for workshop success. A bonus section on inlays and hardware offers original designs that add color, lyricism, and a graceful flourish to ever-popular Craftsman furniture.

**An Eames Anthology** Charles Eames 2015-04-28 An Eames Anthology collects for the first time the writings of the esteemed American architects and designers Charles and Ray Eames, illuminating their marriage and professional partnership of fifty years. More than 120 primary-source documents and 200 illustrations highlight iconic projects such as the Case Study Houses and the molded plywood chair, as well as their work for major corporations as both designers (Herman Miller, Vitra) and consultants (IBM, Polaroid). Previously unpublished materials appear alongside published writings by and about the Eameses and their work, lending new insight into their creative process. Correspondence with such luminaries as Richard Neutra and Eero Saarinen provides a personal glimpse into the advance of modernity in mid-century America.

**Tracing Your Trade & Craftsman Ancestors** Adele Emm 2015-04-30 Almost all of us have a tradesman or craftsman Ð a butcher, baker or candlestick maker Ð somewhere in our ancestry, and Ad-le Emm's handbook is the perfect guide to finding out about them Ð about their lives, their work and the world they lived in. She introduces the many trades and crafts, looks at their practices and long traditions, and identifies and explains the many sources you can go to in order to discover more about them and their families. ?Chapters cover the guilds, the merchants, shopkeepers, builders, smiths and metalworkers, cordwainers and shoemakers, tailors and dressmakers, coopers, wheelwrights and carriage-makers, and a long list of other trades and crafts. The training and apprenticeships of individuals who worked in these trades and crafts are described, as are their skills and working conditions and the genealogical resources that preserve their history and give an insight into their lives. A chapter covers the general sources that researchers can turn to Ð the National Archives, the census, newspapers, wills, and websites Ð and gives advice on how to use them. ?Ad-le Emm's introduction will be fascinating reading for anyone who is researching the social or family history of trades and crafts.
